lecture 4 of 14: risk and social physics

chris wiggins + matt jones, Columbia

texts

Des1

## precondition

- ▶ German “statistics” had not been quantitative

## precondition

- ▶ German “statistics” had not been quantitative
- ▶ however was holistic (‘many columns’), ‘granular’

## transformation

- ▶ D sees this as birth of tables (nb was dataframe, “inclusion of numbers”)

## transformation

- ▶ D sees this as birth of tables (nb was dataframe, “inclusion of numbers”)
- ▶ even w/o math there is  
“framework. . . nomenclature..terminology”;  
“organizatioanal. . . taxonomic”

## transformation

- ▶ D sees this as birth of tables (nb was dataframe, “inclusion of numbers”)
- ▶ even w/o math there is  
“framework. . . nomenclature..terminology”;  
“organizatioanal. . . taxonomic”
- ▶ tension “precise figures rather than. . . literaty terms”

## transformation

- ▶ D sees this as birth of tables (nb was dataframe, “inclusion of numbers”)
- ▶ even w/o math there is  
“framework. . . nomenclature..terminology”;  
“organizatioanal. . . taxonomic”
- ▶ tension “precise figures rather than. . . literaty terms”
- ▶ NB: subjective design choices

# transformation

- ▶ D sees this as birth of tables (nb was dataframe, “inclusion of numbers”)
- ▶ even w/o math there is  
“framework. . . nomenclature..terminology”;  
“organizatioanal. . . taxonomic”
- ▶ tension “precise figures rather than. . . literaty terms”
- ▶ NB: subjective design choices
  - ▶ what to include; what not to

# transformation

- ▶ D sees this as birth of tables (nb was dataframe, “inclusion of numbers”)
- ▶ even w/o math there is  
“framework. . . nomenclature..terminology”;  
“organizatioanal. . . taxonomic”
- ▶ tension “precise figures rather than. . . literaty terms”
- ▶ NB: subjective design choices
  - ▶ what to include; what not to
  - ▶ what to aggregate

# transformation

- ▶ D sees this as birth of tables (nb was dataframe, “inclusion of numbers”)
- ▶ even w/o math there is  
“framework. . . nomenclature..terminology”;  
“organizatioanal. . . taxonomic”
- ▶ tension “precise figures rather than. . . literaty terms”
- ▶ NB: subjective design choices
  - ▶ what to include; what not to
  - ▶ what to aggregate
  - ▶ what to quantify (allowing ordering “comparison”)

## reaction

- ▶ vulgar statistics: “art” v “work. . . superficial” foreshadows

## reaction

- ▶ vulgar statistics: “art” v “work. . . superficial” foreshadows
  - ▶ medicine

## reaction

- ▶ vulgar statistics: “art” v “work. . . superficial” foreshadows
  - ▶ medicine
  - ▶ psychology

# reaction

- ▶ vulgar statistics: “art” v “work. . . superficial” foreshadows
  - ▶ medicine
  - ▶ psychology
  - ▶ docimology

# reaction

- ▶ vulgar statistics: “art” v “work. . . superficial” foreshadows
  - ▶ medicine
  - ▶ psychology
  - ▶ docimology
  - ▶ vulcans (politics)

## reaction

- ▶ vulgar statistics: “art” v “work. . . superficial” foreshadows
  - ▶ medicine
  - ▶ psychology
  - ▶ docimology
  - ▶ vulcans (politics)
  - ▶ vulcans (amzn story)

## reaction

- ▶ vulgar statistics: “art” v “work... superficial” foreshadows
  - ▶ medicine
  - ▶ psychology
  - ▶ docimology
  - ▶ vulcans (politics)
  - ▶ vulcans (amzn story)
  - ▶ biologists vs molecular biologists

# reaction

- ▶ vulgar statistics: “art” v “work... superficial” foreshadows
  - ▶ medicine
  - ▶ psychology
  - ▶ docimology
  - ▶ vulcans (politics)
  - ▶ vulcans (amzn story)
  - ▶ biologists vs molecular biologists
  - ▶ molecular biologists vs comp biologists

## misc from D1

- ▶ NB “census” implies

## misc from D1

- ▶ NB “census” implies

## misc from D1

- ▶ NB “census” implies
  - ▶ 1) taxes

## misc from D1

- ▶ NB “census” implies
  - ▶ 1) taxes

## misc from D1

- ▶ NB “census” implies
  - ▶ 1) taxes
  - ▶ 2) military conscription

Des2

## precondition

- ▶ “Victorian. . . problems of poverty”

## precondition

- ▶ “Victorian. . . problems of poverty”
- ▶ Galton “fascinated” by cousin darwin’s “theory”; wanted to “apply it to the human race, with a view to the biological improvement of humanity”

## precondition

- ▶ “Victorian. . . problems of poverty”
- ▶ Galton “fascinated” by cousin darwin’s “theory”; wanted to “apply it to the human race, with a view to the biological improvement of humanity”
- ▶ see Galton v Q quote

## precondition

- ▶ “Victorian. . . problems of poverty”
- ▶ Galton “fascinated” by cousin darwin’s “theory”; wanted to “apply it to the human race, with a view to the biological improvement of humanity”
- ▶ see Galton v Q quote
- ▶ the idea of assigning ppl to 8 ordered groups was already there

# Galton

## Gould

- ▶ “scientific racism. . . [science] as any claim apparently backed by copious numbers.”

# Gould

- ▶ “scientific racism. . . [science] as any claim apparently backed by copious numbers.”
- ▶ galton

# Gould

- ▶ “scientific racism. . . [science] as any claim apparently backed by copious numbers.”
- ▶ galton
- ▶ bean

# Gould

- ▶ “scientific racism. . . [science] as any claim apparently backed by copious numbers.”
- ▶ galton
- ▶ bean
- ▶ Mall, Bean's mentor

# Gould

- ▶ “scientific racism... [science] as any claim apparently backed by copious numbers.”
- ▶ galton
- ▶ bean
- ▶ Mall, Bean's mentor
- ▶ “but race, sex, and class go together, and each acts as a surrogate for the others.”

# Gould

- ▶ “scientific racism. . . [science] as any claim apparently backed by copious numbers.”
- ▶ galton
- ▶ bean
- ▶ Mall, Bean's mentor
- ▶ “but race, sex, and class go together, and each acts as a surrogate for the others.”
- ▶ “3. Numbers and graphs do not gain authority from increasing precision of measurement, sample size, or complexity in manipulation. Basic experimental designs may be flawed and not subject to correction by extended repetition.” k

# Gould

- ▶ “scientific racism. . . [science] as any claim apparently backed by copious numbers.”
- ▶ galton
- ▶ bean
- ▶ Mall, Bean's mentor
- ▶ “but race, sex, and class go together, and each acts as a surrogate for the others.”
- ▶ “3. Numbers and graphs do not gain authority from increasing precision of measurement, sample size, or complexity in manipulation. Basic experimental designs may be flawed and not subject to correction by extended repetition.”
- ▶ ranking alone is always not even wrong. cf USNWR

3-5 key ideas

## 3-5 key ideas

now hopefully you see the value of the section from lab thursday on self-reported GPAs, running up against 4.0. like chest height's pathology.
